

ALL OR NOTHING

Nothing comes close to Travall when it comes to fleet accessory solutions:

- **The 'Vehicle specific' advantage**

Travall accessories are NOT universal fit! instead they are carefully developed and designed to fit each specific vehicle model and production year so that they perform perfectly, and without compromise.

- **Over 1000 vehicles currently covered**

With new models being developed and added to the inventory all the time.

- **Factory Original Quality accessories**

Which equates to superior design, materials, construction and finish.

- **Super easy and fast installation**

All Travall products are designed to be easy to both install and remove no tools necessary.

- **No vehicle modifications**

No drilling, no bolts, no brackets! Travall products can be removed with absolutely no sign they were ever installed - and most important, no damage to the vehicle.

Premium Quality Accessories

Available for wide range of vehicles

No Vehicle modifications required

Perfect Fit

ALL BASES COVERED

Premium accessories designed to protect your business, your vehicles and their occupants:

- **Reduce costs** related to end of contract damage charges
- **Reduce exposure** to potential litigation resulting from incidents caused by flying unsecure loads
- **Maximise trunk space** and segregate loads
- **Better secure and protect loads**
- **Improve driver productivity and morale** by providing improved vehicle functionality
- **Protect your reputation.**

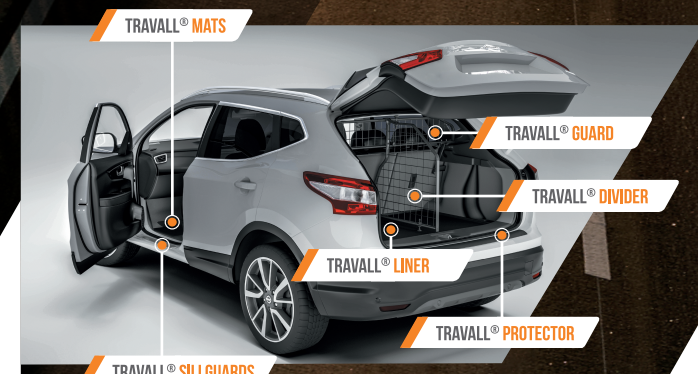

MAXIMIZE THE SPACE

All Travall products are an easy DIY installation requiring no vehicle modifications. At the end of the lease the vehicle is totally intact - no brackets, no drill holes, no damage.

MAXIMIZE THE SPACE

TRAVELL'S RANGE OF QUALITY UPGRADES WORK EITHER INDIVIDUALLY OR AS A COMPLETE PROGRAM. THEY ARE ALL VEHICLE SPECIFIC FOR A PERFECT DIY FIT - WITH NO TOOLS OR VEHICLE MODIFICATIONS REQUIRED. TRAVALL UPGRADES REPRESENT AN INVESTMENT FOR FLEET OPERATIONS, ADDING VALUE.

Reducing non-insurable, administrative and vehicle off road time / costs related to any repairs or maintenance which travall products help protect against.

Reducing HR related costs - Helping to reduce driver turnover and absenteeism whilst improving recruitment and retention due to the employer better providing and caring for employees and their welfare; and for providing enhanced tools to better allow them to do their jobs.

Reduced Insurance costs - Fleet customers should check with their insurers to see if a reduction in premium is available due to reduced liability and risks associated with Travall equipment vehicles.

LIMITING END-OF-CONTRACT CHARGES

All Travall products can protect the vehicle against costly end-of-contract.

Travall Guard segregates the boot area, helping to prevent loads from contacting and potentially contaminating or damaging the main cabin of the vehicle.

Travall Protector and **SillGuards** both offer superb protection against people and loads moving over vehicle threshold areas, preventing the kind of damage to bodywork which commonly occurs to fleet vehicles.

Travall Mats and **Liners** protect against the soiling of heavily contacted surfaces by people and objects. Both products are easy to remove - along with any collected mess.
